5. Understand the merits and limitations of fMRI as it compares to other methodologies used in cognitive neuroscience
6. Apply active learning, critical thinking and problem-solving to the study of human cognitive neuroscience

Tuesday February 27

****Midterm Exam****

Friday March 2

Lecture 12: Vision & Perception

Students will receive a 0.5% grade for producing a viable question (with correct answer) that could be used in an exam (i.e., it must require that one knows the course material to answer it correctly and it must be of average difficulty). Otherwise, students will receive a 0% grade for that particular question.

3. **Submission Guidelines:** Each team's video presentation will need to be uploaded to youtube on a date that is to be announced and the link to be provided. Failure to do so will result in a late penalty.
4. **Grading:** Your total grade (20%) for this team project will be made up of the following: (1) 15% will be determined by the TA and me, based on how well the criteria in #1 are met, and, (2) 5% will be derived from an average of peer evaluations (i.e., grades received by your classmates). Note that content derived from the video presentations is fair game for the Final Exam and thus, attending the video presentations of your peers will prove to be in your benefit.

Research Proposal (20% of final mark):

You will be required to

B	73-76	Good
B-	70-72	Reasonably Good
C+	67-69	Acceptable
C	63-66	Minimally Acceptable (Hons.)
C-	60-62	Minimally Acceptable (Gen.)
D+	57-59	Unsatisfactory Pass
D	53-56	Unsatisfactory Pass
D-	50-52	Unsatisfactory Pass
F	49 and below	Failure. No course credit

Late Policy:

for the Fall Term is posted before the Thanksgiving holiday; for the Winter Term it is posted the Friday before Reading Week, and for the Summer Term the window of dates is noted on the Arts and Science Online syllabus prior to the start of the course.4()-4(cou)14(r)-3(se.4Mu)1 .33.98 Tm[(O)-4TJETBT1 0 0 1 53.8281
