Learning Outcomes

Develop an understanding of experimental research

Hybrid Offering:

- Classes which provide background information for tutorials and research units will be replaced with online material to provide that information. It will be available online during the class time to address any questions (see schedule below).
- In-person classes will be used to work on tutorial assignments and for data analysis and writing for research units.

Research Units:

- There will be two research units, each focusing on a particular topic in visual cognition.
- Each research unit will last five classes
- The first class of each research unit will be replaced with online material in which the professor will provide a lecture introducing the topic and relevant readings
- Readings and reflection papers must be completed prior to the second class.
- During the second class, the readings will be discussed and experimental data will be collected.
- During the third and fourth

Tues. Dec. 3

Disability Accommodations
